A few steps only to get your own TwinPilot

INSTRUCTIONS FOR YOUR PHOTOS

Soon we are able to start sculpting your head digitally!
To get started, we need five photos of your head. Before taking the photos think about how the facial expression, you would like to see in your cockpit later on and don´t change your expresison during the shooting.
The following five views are needed:

Left view

Diagonal left view

Front view

Diagonal right view

Right view

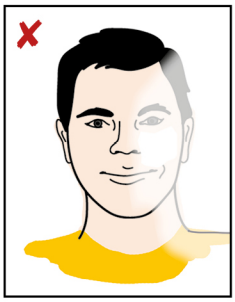

The sculpting result depends on the photo quality.
Please consider the following instructions:

- Take the pictures from a distance not less than 3m (ca. 10ft) so that the head fills the format. Do not use wide angle cameras or mobile phones without a portrait mode.
- Camera at the same height as the face
- Do not crop the head
- Light the face properly and evenly (outdoor, no direct sun light)
- Set the focus right (sharp picture)
- Remove items like scarfs, glasses or hats etc.
- Eyes open
- Choose a facial expression (a smiling pilot appears particularly likeable)
- File formats: jpg, tif, bmp, png
- Favorable pixel count not less than 960x720

Please avoid:

Head cropped

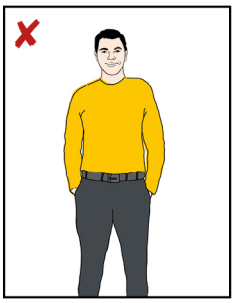

Shaded or over-exposed areas

Items hiding your face

Blurred photo

Eyes shut

Head not format-filling
